## Systems Engineer/Operations m/f

### **You are looking for technical challenges ...**

emarsys Broadcast is our performance-optimized, highly scalable email marketing platform. As our Systems Engineer, you are responsible for the operation and maintenance of the emarsys Broadcast productive systems. This includes ensuring high availability, adjusting the infrastructure to growing customer needs, rolling out new software versions and performing data migration processes. In order to achieve all this, you deploy a state-of-the-art infrastructure which involves server virtualisations, clustering, storage solutions, etc. Based on your in-depth knowledge about the Broadcast application which you acquire over time, and with the help of fine tuning, you exploit the existing possibilities of our system to maximum effect.

### **you come with a wide range of know-how ...**

As a technical allrounder you effortlessly handle both the Unix/Linux system administration and the use of internet technologies like HTTP, DNS, email, SSL, etc. The Broadcast platform is implemented in Java and uses PostgreSQL as a database backend – experience in this area helps you to get started. You use automation technologies like scripting to make your daily work more efficient; in addition, you have knowledge of network administration.

### **you take on responsibility in a team ...**

You are known for your self-dependent way of working, but you also appreciate exchanging thoughts with others and the support a team provides. Challenges do not scare you, and you are able to solve even the trickiest problems. When working inter-divisional as an interface between individual IT departments, you manage to keep an overview and initiate all appropriate measures to ensure smooth operation.

### **and service orientation is important to you?**

As a service provider, our success is based on the satisfaction of our customers. Your commitment helps to ensure the quality of our products as well as optimal customer service. This includes your willingness to work, on occasion, in the evening and on call; these tasks will be assigned to you after an orientation phase.

### **Then you are with the right company!**

We offer exciting challenges in an international, well-motivated team, as well as a pleasant working environment in a growing company.

Annual gross starting salary of at least EUR 35.000,--, depending on your professional qualification and experience.
