

In the past year emarsys UK has grown exponentially and is a leading Email Platform and Service Provider in the UK with hundreds of international clients and cutting-edge technology. Currently emarsys has offices in London, Vienna, Munich, Berlin, Paris, Zurich, Hong Kong and Beijing. As part of its rapid expansion programme emarsys is now looking for additional talent to drive its growth forward and you will work within a young, dynamic Technical Operations team managing a variety of emarsys UK clients.

More than 800 companies worldwide are among our satisfied customers and send a combined volume of more than 3 billion emails each month using our email platform. We also manage the work for eBay globally, Vodafone, Coca Cola, Canon, Motorola, Honda, Burton, Playboy UK, Zurich Insurance, Deloitte and many more.

## Technical Integrations Manager - London

### Responsibility:

- Management of customer relationships – provide insight and support for client services
- Manage and deliver integration projects, custom client developments and deliverability advice
- Troubleshoot and resolve complex technical questions
- Attend client meetings to provide technical insight and value added integration options

### Requirements:

- A strong technical background with a significant focus on online marketing
- In-depth knowledge of web applications
- Solid knowledge and hands-on experience with internet technologies & standards;  
**Email protocols:** SMTP, DNS, HTTP, IMAP, and POP  
**Web technologies:** HTML, PHP, JavaScript, MIME, and SSL  
**File transfer & encryption protocols & formats:** SFTP/SCP, CSV, XML, PGP, encodings.
- Basic knowledge of most common programming languages regarding web development; *PHP, Ruby, Java, etc...*
- Sound knowledge of Linux
- Good communication skills & the willingness to work intensively with possibly "challenging" clients
- Accuracy, ability to work independently and strong commitment
- Ability to work in team with outstanding motivation

### Desirable:

- IT related undergraduate degree
- Understanding of Linux/Unix text tools (grep, awk, sed etc) is a plus
- Basic Unix command-line shell & scripting experience
- Basic SQL & Database skills
- Experience with existing web service API's;  
*E.g. Twitter API, Facebook API*

### Personality:

- Quick learner
- Team player
- Works well under pressure
